Our revolutionary Holding Cabinet Control System allows for complete, reliable, and affordable control over any commercial holding oven via a combination of innovative new Renau Single-Wire Network products, intuitive and simple wireless communication, and advanced diagnostic features. This sample 2x2 Configuration features:

- Simple, reliable wireless communication from the WHA-105 Wi-Fi Module to mobile devices and our cloud-based Smart Kitchen Manager (SKM).
- 2 fully-configurable and sealed SPS-248 Capacitive Smart Panel Switches. (No Overlay!)
- Up to 12 temperature sensor inputs
- Full control of up to 8 heating elements
- USB-based configuration and firmware updates
- Equipment analytics and current sensing
- Innovative equipment status indication
