Renau's STC-06 Offers Unprecedented Design Flexibility and Superior Six-Channel Time and Temperature Control

Instinctive, Ultra-Compact Module Interfaces with Renau's Single Wire Communication Network and Measures Only 1/2" in Depth

4/22/2009

CHATSWORTH, CA—April 15, 2009— With a slim, contemporary design, Renau's new STC-06 Smart Timer Controller is an extremely compact, intuitive display interface device that is aesthetically pleasing and can be placed virtually anywhere on your industrial equipment. Our STC-06 packs tremendous performance into a unit only 1/2" in depth. This allows equipment manufacturers unprecedented levels of design flexibility, while giving equipment operators powerful, intuitive control over up to six-channels of both time and temperature.

Using Renau's Single Wire Communication Network, the STC-06 connects to Renau's compact, patented Hybrid Micro Control Series process controllers to power even the most intensive and demanding applications. Operators and customers see a sleek, unobtrusive display that can be mounted anywhere on the appliance, from door panels and edges to frames and more, eliminating expensive, complicated harnesses while keeping the process controller out of sight within the controlled equipment.

The easy-to-use interface simplifies operator training and reduces the amount of time necessary to carry out processes. With six bright, LED backlit icons and an intuitive push-button interface, the STC-06 is simple to use and can fit any application.

Despite its small size, fully-customizable warning messages on the high-visibility 3x7 Segment LED display alert operators to any errors or potential problems, while built-in fault detection quickly and clearly identifies the cause of the error, cutting down on both valuable troubleshooting time and food waste.

Designed with the foodservice industry's harsh environments specifically in mind, the STC-06 is fully encapsulated for outstanding protection from extreme temperatures, humidity, and shock. Designed and manufactured in the USA, all Renau products are rigorously tested and come with an extended three year warranty.

About Renau

Renau Electronic Laboratories designs and manufactures custom electronic microprocessor controllers and is an ISO 9001:2000 Certified Company. As a commercial manufacturer, Renau holds numerous exclusive worldwide rights and patents. Our products have a wide-range of applications, including industrial machines and the food-service, water purification, aerospace, and defense industries. We can custom-tailor a product to match your specific needs and applications. At Renau, we do more than design. We invent!
